HOW TO DO THE ELECTROPHYSIOLOGY LAB

Using the software requires you have a UCSD email account because you have to log into the ACS computers to bring up the software; if you don't have an account (all UCSD students should), you will have to go to the lab with someone who does; if you're an extension student and were not assigned a UCSD email account (you should have been), talk to your extension contact person about getting an account.

Keep in mind that if you wait for the last minute to do this and encounter problems, your last minute emergency will not become our last minute emergency. If you need help, you can come to one of the TA/IA’s office hours.

If you go to CSB 101 or 114 to do the lab, you need to go to this webpage to get a code to access that room:

If that link doesn't work, go to www.cogsci.ucsd.edu, click on Undergraduates, then Resources, then Lab Access codes. If you are an extension student (or if that website doesn't work for you), you will have to go to Thanh Maxwell, the undergraduate advisor to get a code. She is listed in the "Administrative Staff" category under the "People" link at www.cogsci.ucsd.edu. She updated the people in the class to reflect those who are registered. She is the only person who can deal with problems of getting a code so talk to her! Note that she leaves the office by 3:30 or 4 pm.

Here's her information:
Thanh Maxwell
Undergraduate Coordinator
